## **A Note From The Editor**

By Allen McGee

Founder and National Director

It is with great pleasure that I and the staff of The United States UFO Information and Research Center can bring back to the journalistic community a true gem in the science of UFOlogy and the study of the paranormal. The "rebirth" of The AMERICAN UFO JOURNAL is accompanied by the birth of the NEW Alternate Realities Center, or The ARC.

## **Upcoming Events ~ Community Calendar**

The USUFOIRC, the parent organization of The ARC will host the next International Public Awareness Event appropriately entitled the Alternate Realities Conference - The ARC 2002. This year's Annual Convention will be held at the conference center in Roan Mountain State Park, Fri-Sun, June 21st-23rd.

Roan Mountain is located on the border of Tennessee and North Carolina on the beautiful Blue Ridge. For more information about Roan Mountain, and the upcoming events to be held there, including guest speakers, please visit our conference website at [www.etconference.org](http://www.etconference.org).

In other news, the former Northeast Tennessee UFO Network - NTUFON has changed its identity to encompass the greater number of people who have

joined us over the past 4 years. Now called the Southern Appalachia UFO Network, or SAUN, this local affiliate of the USUFOIRC hosts monthly meetings and public skywatches in an effort to help increase public awareness of both UFO and other paranormal phenomena including Bigfoot, Sasquatch, Ghosts, Angelic Visitation, Earth Changes and Prediction, as well as other aspects of mind broadening concepts of the human experience. SAUN invites everyone to join them in the search for truth and understanding in support of the scope and undertakings of the United States UFO Information and Research Center. More information about SAUN and the USUFOIRC can be found online at [www.usufoirc.org](http://www.usufoirc.org).

## **Inside This Issue**

In this edition of The Journal you will find very little commentary over political matters, or world issues. This, the first issue published for quite some time will, will concentrate on the numerous case forms submitted to the Research Center over the past several months. As a subscriber to this publication you are the first to hear of these sightings and/or encounters. There has been little, or no editing to the reports you will read herein. They are presented here for the first time as we received them and as they originally submitted. All reports are subject to investigation and every effort is made to follow up on the reports where possible. Enjoy!

## Encounters Past & Present

Each of the following accounts are word for word according to the reports submitted by the witnesses, or the reporters through the USUFOIRC Case submission and documentation form located at [www.uforeporting.info](http://www.uforeporting.info).

**Burlington, North Carolina**  
**November 09, 2001**  
By Andre McNeill

At approximately 9:25 am EST I was saw a brown object over head to the nw as I am walking past the Alamance Building at Elon University. I asked another passer by if he could see it and he said no, although I could still see it. As I was pointing out the object, it starts to speed toward the northwest, beyond some trees which obstructed my view, so I was not able to track it. Incidentally, there were brown leaves falling from the trees, but I could tell the difference between this object and the brown leaves. It was sort of brown in color, with just a hint of a reflective surface. It did not make any "detectable" sound, and I estimate its height was about 1000 or 2000 feet, although, since it look like it was "small". I put down circle, but really it was just a dot since I could not make out any details besides it was brown and seemed to reflect sunlight. Hope somebody can verify aircraft in the region of Elon University, either meteorologist or air traffic. I did see a plane about 10 or fifteen minutes later, heading north east, but that was way past the time the unidentified object was out of the vicinity as far as I could tell. Incidentally, I am a skeptic about extra terrestrial craft, but I have seen Unidentified Flying Objects two other times before that had puzzling flight activity. This the first one I have seen during the day.

**Kingston, Pennsylvania**  
**July 23, 2001**  
By Angelo M. Dalla Verde

As I sat looking at the night sky from my upstairs window. I can usually see the big dipper perfectly in the western sky. From the south came a light (not blinking) that was orange or brass colored with a bronze ring on the outside. It seemed to be moving higher and much faster than the normal jet and after it passed to the northeast I heard no jet or prop sound. I'm sure it was the meteor that was all over the news the next day but, can meteors orbit before they fall? Anyway it was that meteor or maybe another one. Although, another strange thing about this is it had no tail either. It was just a brass glowing globe. That's it. Hope you enjoyed it. I did. My first sighting even if it was a meteor.

**Odense, Denmark**  
**July 4, 2001**  
By Anonymous

Large fluorescent object was spotted at exactly 2:10 over the city of Odense, Denmark date: 4 July 2001. I've never seen anything like it, I've seen asteroids, satellites etc, but nothing like this. The objects flies from south to north with a very high speed considering the distance of the object, it glows a bright bluish-white, it de-accelerates, stops and fades and then glows a metallic blue (very bright with a ring of blue around it), then it fades a bit and accelerates further north. I was in bed when I saw it, but with an open window, there was no reflection from any glass or anything, the "object" did not omit any sounds that I could hear. I immediately dressed (as fast as I've ever done ever) ran outdoor, but the object had vanished, I stood observing for at least 10 minutes, but nothing to see except a clear dark-blue night with lots of stars.

**Douglas County, Oregon**  
**August 27, 2001**  
By Antonio Andre Arana

I was on my way to work which is 60 miles north of where I live. I was traveling northbound on I-5 on a clear blue sky with the sun still shining brightly at roughly 6:15 pm. I am cruising along at about 70 mph on a straight stretch of I-5, and almost directly in front of me, maybe a little on the right, roughly 5000 feet up, a bright glare kinda shines right in my

# The AMERICAN UFO JOURNAL

---

~ Page Three ~

face. I am looking at what made the glare, and what I come up with is a UFO that was flying north, but changed it's course, and turned left almost at a 90 degree turn, and that is what the glare was. When it turned, the sun reflected off of it like a mirror reflecting the sun because the object was shiny silver, fairly large almost the size off a commercial airline, but this object had no wings or tail like a plane, it was kinda cigar shaped except fatter in the middle. Now this object is flying broadside in front of me heading west towards the pacific ocean. This is when I looked at the mile marker to see where I was. I had just passed mile marker 165. I am still going along at 70 mph watching this object, I take off my sun glasses just to observe this thing. There was no white smoke cloud such as you would see from a commercial jet, as a matter of fact there was nothing, no lights, or windows, or anything, just this object moving at a high rate of speed west. By the time I had gotten to mile marker 166, this object was no where in sight, gone, history. I was looking everywhere and nothing. Just to keep from getting into an accident, I pulled over, and got out of my car to look around. I saw nothing, heard nothing, so after a few minutes I got back into my car and proceeded to work. I have lived in Oregon for 34 years, and I know that the airlines fly north and south, I have never seen a big plane flying west, why, because there is nothing there but the pacific ocean. I also was in the Army for 4 years 82-86, so I know what military jets look like, and believe me this was no military jet although it moved very fast like one. I was the only occupant in my vehicle, therefore I can only speak for myself, but there was other people on the freeway that had to have seen this object, whether or not they paid any attention to it or not I have no idea, I am the only one that pulled over I know. Anyway, that is what I saw, and believe me I am not the kinda person that makes shit up, or reports things on a whim, so now I have told my story to you whomever you are. I also told a couple of people at work, but they kinda look at me like OKAY WHATEVER, so I don't think I will tell to many more people.

**Erie and Meadville, Pennsylvania**  
**Summer 1977 or 1978**

By Arlene Kay MacMonagle

Every week I attended a class at 7pm in Meadville, PA. I would always leave the house in Erie about 5:50pm, get gas and drive 40 minutes to Meadville to the class site. I was usually there about 6:40-45 and before anyone else arrived. I helped the teacher set up the room. On one occasion (clear hot day) I did everything the same and when I walked into the room, instead of it being about 6:45 it was 7:20pm. I was stunned to realize the class had started and I was late. I couldn't understand what happened. I was told to sit down because I was just standing there stunned. Later I checked and the clocks were fine. The only explanation I have is that I lost about a half an hour. While I was driving. I remember no break in the trip. I can't believe this will be of much value but it has puzzled me for all these years. I know the times were right. Something happened and I have no idea what.

**Holland, Michigan**  
**Winter 1993 or 1994**

By Betsy A. Johnson

I was outside in the spare lot by my house, this was back in 93/94 during the Lake Michigan flap (my friend actually baby sat someone who lived by the lakeside where one of the sightings that made it to the news happened), my dad locked the back door on me when I went to lock up my pet Banty chickens for the night. I like to star watch a bit, so I gazed up and to the west, but then I felt a vibration in the air and looked around, behind me coming from the east was a huge coal-black triangular UFO, it was an isosceles triangle shape, and it was blocky - know what I mean? Like a squat prism, I had to wonder just how it managed to stay up! - and it was moving slowly over the treetops. I remember, it had a light at each corner on the bottom, and a bump near the center where there was a dimple with a blinking red light dimmer than the others, it seemed to have stuff like lines or partially embedded wires/tubes around it, the best I can describe the texture is like a triangular version of a Borg cube from Star Trek. it was also big, like the high school football field I was in awe... I couldn't move... I knew I was seeing something unusual, I wouldn't necessarily go as far to say it was definitely an alien ship, but it was at least a form of technology not

# The AMERICAN UFO JOURNAL

~ Page Four ~

known to exist by the public! Eventually tho, before I could think to run for a camera or a neighbor or parent or whoever, it sped up suddenly, and like a flash it was gone!

## **Trout Lake, Washington**

**August 18, 2001**

By Bill Coones

We were camping on the Gilliland ranch near Trout Lake, WA and UFO spotting there with a group of people. We have been there several times looking for UFOS and other night phenomena. One lady in the group shouted that she saw a moving triangle overhead. I looked and picked it out from the numerous stars. Went over to photo with my camcorder but it would not pick it up. It was a formation of three points of light almost the same intensity as an average star. One light was ahead and two behind in an elongated triangular formation that lasted through the whole sighting. Could see stars through the formation as it passed along the sky from a north to south direction. All in the group could see it. As the formation went in southerly direction after about 1-2 minutes of view the lead point of light faded out and then a few seconds later both the trailing ones faded out also. During the night also I noticed many flashes of light, like a strobe, coming from the central part of Mt. Adams above tree line and below the peak. These flashes were intermittent and could be seen best through binoculars. They were much higher than the tree line of the mountain and near the snow area. Not in the same place with each occurrence, and in a wilderness area. My sister wife and mother saw these flashes and several of those present.

## **Franconia Notch, New Hampshire**

**October 13, 2001**

By Boz H. S.

I am writing on behalf of the two witnesses; they do not wish their names public. I have very detailed info. and invite you to contact me. Ref: an object, 8' long cigar shaped passed over front (hood) of pickup truck at 12' - measurements as compared to size of truck) very close up, basic black luster - with string of "windows" -

(like a zipper...) across length upper part - seems to have "fins" at each end - truck was traveling south on INT 93 - in the Franconia Notch, during daylight (3 PM) no other traffic. Object was right in front, and slightly above hood of pickup. Witnesses have hesitated to talk about incident. I am a family member, and have had them make sketches and clay models - and they are all close in description.

## **Lagrange, Illinois**

**October 2001**

By Bobbie J. Pemberton

I had earlier in my home, taken pictures that investigators agreed, were Spirit Picture taken by a digital camera. I then thought that I might get pictures of Paranormal Phenomena, by going to a Cemetery, that had long been known for it's Paranormal activity. I actually did not expect to see anything, but my husband rode along, and took several picture of me, with a digital camera. To my surprise, in these pictures there were so many strange Orbs, and even another face, that seemed to hang over my own, that I was really in shock!

Here is a picture of the incident I am reporting.

This section of the journal continues to page five.

**Cottage Grove, Oregon**  
**December 16, 2001**  
By Brandon Edward Burge

TALL FURY LIKE GORILLA, "BIGFOOT" RAN ON TWO FEET, AWAY INTO WOODS, BY RIVER. MADE EYE CONTACT.

(That was all there was to this report. No further information was given by the witness.)

**Prattsville, Arkansas**  
**August 29, 2001**  
By Brittany Henderson

I saw a big round object that had flashing lights on it in the colors blue, green, yellow!!! It was beautiful until it pointed a light on me. Then I ran away and I called my mom but, I wasn't scared. I thought it was going to suck me up into the craft but it didn't I guess I got lucky. Well from then on I have always believed in UFOs.

**Warrenville, North Carolina**  
**June 12, 2001**  
By Butch Lucas

I was traveling on Highway 88 West, through a small community of Warensville, NC. The time was 10:38 pm. As I came through some sharp S-turns into the town. I saw 4 lights hovering over a hill. I turned onto Hwy 194 toward Lansing, the lights were on my drivers side and I could get a better view of them. It was at this point I noticed that the lights formed a triangle with a light in the center. The outer lights were bright white (like a floodlight) and the light in the center was a dimmer almost yellow light. The object made no sound. I slowed my vehicle down to get a better look. Just as I came to a stop the object flew directly over my car, heading southeast towards Jefferson, NC. It had an altitude of, to my best guess, of less than 500 feet. IT went behind some trees so I pulled my car forward to get a better look. I could tell the object was triangular shaped as it was silhouetted by the stars behind it. It did not move point first, but rather what I would call tail-first. The lights never blinked or changed intensity. I watched the object

for about 2 minutes, until it flew across a mountain and out of sight.

**San Francisco, California**  
**November 5, 2001**  
By Caisiy Ann Bundock

My mother was driving, and saw a silver reflection in the sky under the sun to the lower left ( south/west). It was like a round mirror reflection in the sky that slowly faded away. It looked like someone tipped the mirror so that the glare from the reflection grew smaller until it was gone. There were jet streams in the sky from jets that had flown by recently, I did not see them fly by. Going towards the airport I expected to be seeing airplanes in the sky. Airplanes do not just disappear out of the sky. As far I have experienced they can not fly directly away from you so that you can not see them , there is always an angle where you can see them due to the earths curve. I mentioned to my mother what I had seen. A few minutes later near the San Francisco State University I saw the same thing again in the same area of the sky. As we approached the airport I saw nothing else but planes landing and taking off.

**Dover Delaware**  
**March or Aril 2001**  
By Christie Anna Brittingham

I was at the end of my lane waiting for my ride to pick me up for work when heard a soft roaring sound. Thinking it was a plane I turned my head and looked up and over my shoulder. Around tree-top height was a large triangular-shaped object, darker than the night sky, with two white lights beaming on either side and one red light flashing in the middle glide over me and towards the woods on the other side of the highway. After my initial sighting of the object I noticed that I no longer heard any sounds whatsoever. It continued it's course across the high way and over the woods and then proceeded to turn \*around\* and come back still hovering over what used to be a cornfield by Acorn Farms. The entire time it was hovering the white lights were roving back and forth over the area like it was searching for something. The whole experience was about two and half minutes long. My ride, who lives a couple houses

# The AMERICAN UFO JOURNAL

---

~ Page Six ~

down the road from the park I live in, pulled up and saw it also. I won't include her as a witness because I don't have her permission to give her name and phone number. This incident happened about 1-2 months ago; March-April. I'm aware that this sounds like a stealth aircraft but it struck me as unusual that such an aircraft would fly so low to the ground and search a defunct cornfield and wooded area and not continue out of sight as I would've expected.

**Centerhill, Lake Reservoir**  
**November or December 1998**

By Cookie Hullett

I witnessed a 30 to 35 ft wide totally blacked out, dead silent UFO app. 100 ft. away from me as I was stargazing. I am an amateur astronomer and saw the object drop into a Centerhill lake rift; TVA lake reservoir valley which borders my property. These dimensions are exact. I was looking for near dark objects on a crystal clear night and know what I saw. It could only be described as a fixed wing hand glider, but not in the woods, at night with no fixed landing light as a landing reference. It approached at app. a 25 to 30 degree angle and i saw it for app.10 to 15 seconds before it dropped below the ridge headed easterly. Any reference to my submission is appreciated , I wish to add it to future database for the next converted skeptic.

**Tupelo, Mississippi**  
**October 19, 2001**

By Cullen Brooks, Jr.

Saw greenish light with faint red light at rear, moving basically west to east at an incredible speed, dipping slightly down and then back up. Object was observed moving across the entire horizon in about 2 seconds. Object was definitely not a plane nor any other known aeronautical object. My first reaction was that it was a falling star, but I have never seen a falling star with this kind of light or this incredible speed. I didn't say anything about it until my girlfriend said something about it. We saw exactly the same thing and described it the same way. I have always believed that UFOs were possible but have never actually seen anything that could not be rationally

explained. I have been on every continent, except Antarctica, and never witnessed this phenomenon.

**Kansas City, Missouri**

**August 27, 2001**

By D. Knipfer

Over the last two months, have seen an object light at 15 degrees altitude traveling in north direction toward 355 degrees. This happens between the hour of 2100 to 2155 at the latest. The light appears quickly and then fades to invisibility in about 8 seconds at the longest. Binoculars show it better, but still dimming out completely. There is no sound associated with it. In the latest sighting, the object appeared to waver slightly. This was also the brightest showing, approximating Venus in the early morning sky.

**Kansas City, Missouri**

**October 26, 2001**

By Dana Andrew Dougherty

My cousin and I were outside when suddenly we heard a whirling machine-like sound. We looked up and saw a large circle of lights (red, white, and green). We estimate it to have been about 150 feet off the ground. It moved slowly at first, but after about 10 seconds it gained a tremendous amount of speed and flew off.

**Lathrop, California**

**September 22, 2001**

By Dave Bass

The object appeared to be oval shape light colored against the night hovering and then proceeding south, lights then appeared green and red, with red lights seemed to be rotating around green lights, observed object approximately 5-6 minutes before object in a matter of seconds flew out of sight after hovering and moving slowly.

## **Manhattan, Kansas**

**December 1, 2001**

By David Bonine

Me and my girlfriend were driving home to Manhattan from Kansas City. On the way off of I-70 and onto Highway 177 my girlfriend pointed out something in the sky. I pretty much immediately pulled the car to the shoulder of the road so we could look at it. We were facing North, and we could see it out the front of the windshield. It looked kind of like a meteor shower, but meteor showers are very quick and fade, this event lasted a solid 30 seconds. At first it reminded me of the footage of when the Mir space station entered the atmosphere. There were about 3 or 4 brighter objects, and about 6 or 7 smaller objects. All of the objects produced a trail of orange light behind them. It is really hard for me to discern if the objects were descending or ascending. I immediately thought it was a meteor shower, but I've seen meteor showers, and that it wasn't it, then I thought it could be satellites or the space station falling to earth, or possibly rockets being fired, if they were rising objects that would make sense, and I suddenly thought we were witnessing Armageddon. But the news hasn't said anything about anything, its possible it could be a large group of UFO's.

## **Buckland, Massachusetts**

**Last Week of July, 1986**

By David D. Newell

While driving home from an outdoor movie theater, prior to midnight... a hot summer evening... my wife and I noticed a most remarkable and peculiar red light on top of a 'tension pole' (utility pole used to 'cable' a utility pole which carries electric and phone lines). This 'tension pole' was about 20' high - did not have power lines... only a cable running over the road supporting a power utility pole.

I was driving... pulled over to the side of the road - we both remarked on the light. I then put the car into reverse, and backed up to the pole, and pulled over so that pole was in front of my car. We watched this very strange small brilliant red light, moving, darting, dancing... never staying still. It hovered about 6 to 10 inches above the top of the pole...

moving about. Every so often it would 'fly' down the pole, sometimes spiraling about the pole... to perhaps 6' above the ground, and then would move rapidly back up to the top.

It did this several times... I decided to get out of the car to get a better look at it... my wife objected, but I went anyway (she stayed in the car). I stood at the base of the pole, and watched the red light for several minutes. It had the color of a red tail-light or brake light... very similar color of red, as I recollect. It continued to shimmy, vibrate, dance about... came down the pole again, but not so close to the ground.

It is now, as it was then, impossible to describe, other than to say it did not have a specific form, and its shape could not be described. It was small, and without form, but very bright. It's 'aura' (the 'thing', plus the 'glow' around it) was probably less than 3 or 4 inches in diameter..but again, it had no precise 'edge'.

Suddenly, the light 'lifted off' the pole, and flew over a corn field which was along side the road... large field, about a quarter mile along the road, and several hundred yards back. The light flew so rapidly I could not believe it... it swept to the north, somewhat parallel to the road, but just over the corn... sweeping all the way back to near where a set of barns stood (dairy farm), and swept back... riding probably only 3 to 6 feet above the top of the corn, and going so fast, it was like a red line. I later tried to measure the distance, roughly, and recollect the time it took to move to try to come up with an estimate of its speed. I do not remember exactly today, but I recollect computing a fantastic rate of speed.

The red light did several 'sweeps' over the corn, in graceful turns... and then went west - back beyond the field - and disappeared. After waiting a few moments for it to return (it did not) we drove home.

I spent several hours the next day, revisiting this place - talked to people who lived in this area (none had ever heard of such a thing, and wondered if I was 'confused'). I also called the University of Mass. (Amherst) spoke to two professors in the science dept. - tried to learn about phosphorescent life forms,

# The AMERICAN UFO JOURNAL

---

~ Page Eight ~

unusual atmospheric phenomena... but could not learn anything helpful.

I did later research, on my own, to try to come up with a physical explanation of this... but could not. It is the most bizarre and fantastic thing I ever saw in my entire life.

## **Sissonville, West Virginia**

**October 19, 2001**

By Dayton Wayne Reed

As I drove off from my farm in the outskirts of Sissonville, WV, I saw what I believed to at first have been a star. The bright light rose up over the East Ridge and continued at a height of around 30,000 feet. This UFO as it seems, was moving at very high speeds... I stopped my truck on the ridge and watched as this "object" moved across the skyline in around 2 minutes. If this was a plane it had no signal lights (red lights along the wings of planes) on it whatsoever, just a very bright, white light. I called my wife and told her to hurry over to the window and look at it; she was just as amazed as I was. The only thing my wife and I could think that it would possibly have been was a satellite, but never in my life have I ever seen anything move as fast as this UFO had.

## **Grace, Idaho**

**August 23, 2001**

By Devin Silvernail

The object was sighted about 8:34 at sunset. I was looking at Mars, and there was a UFO shaped object going northeast. No lights, and no noise. Going kinda fast. Dark grey in color.

## **Glen Burnie, Maryland**

**June 1, 1990**

By Doug L. Stancil

People's Park was a tiny lunch area with picnic benches and a small area of woods situated on a creek in the back of a huge industrial park off of Ordinance Road in Glen Burnie, Maryland. My friends and I would go there to drink beer late at night. One night at about 2 a.m, I drove up to the park with a buddy and as we pulled up we saw flashing lights coming out of the creek and up over the ten foot

embankment. These lights were very intense and lit up this whole park. They were flashing rapidly in many colors in big huge beams. We couldn't see over the embankment to see what was producing this light and we sat there for about an hour trying to decide what it was. We both were too afraid to walk down and see. The only thing I've ever seen that I could compare it to is maybe the light show at an Iron Maiden concert-but there was no music or any other noise and I couldn't imagine what could possibly be producing those lights from the water. I've always regretted not going down to see, but at the time we were afraid we might be abducted! Shortly after this incident this park was closed down, cleared and fenced off. I learned later that there is some sort of military armory just right around the corner on the banks of this creek where this incident happened. I'll never know for sure, but I sure do have my ideas.

## **Oklahoma and**

**White Sands, New Mexico**

**May 9, 1996**

By Stanley Emery Komonce

I had 2 events. Because I know that there is a higher power I wanted this higher power to prove it to me some how , so I went to my window and looked out side and said to my self if there is a higher power I will see 3 shooting one at a time only when I say (now). So I waited I don't know how many seconds and said now and there it was. Wow, so I waited a few seconds and said now and there it was. I was quite happy by this time, I thought what are the chances. I tried it again and zoom there it was and believe me, when I said now it was instantaneous and, the seconds in between were obscure and totally random. I don't know if there is any connection but, the next morning I heard on the news that 3 pro skydivers fell to there death over Antarctica. They said they probably couldn't tell where the ground was, you know, because of whiteout conditions.

The other event was maybe 8 and 9 years ago. I was leaving my wife, although I came back to her but I'm divorced now. I was living in Oklahoma at the time. I figured I would check out the job prospects in Arizona. Little did I know that my driving route would

# The AMERICAN UFO JOURNAL

---

~ Page Nine ~

bring me through Roswell, New Mexico as well as White Sands. Well I don't know the number of the highway that goes from North to South into Roswell but, it was the darkest road I ever been on. Well here's the story while just outside of Roswell the cruise control in my car died, no big thing, I pulled into Roswell for some gas. I got my gas and got back on the highway. I would have stayed if I would have known it was a big tourist attraction. I thought the people would have thought I was nuts if I would have wanted to see the crash site so I left. I slept in my car 20 miles down the highway. The next morning I was on my way, I finally came into White sands and was driving West. I don't know the number of that highway either, but right after I passed the water tower with the painting of the space shuttle on it, I looked up and saw what looked like a tiny moon, it was the size of the head of a nail at arm's length. I also noticed a tiny shadow that it was casting right behind it in the sky. I know this is impossible, but that's sure is what it looked like. Whatever I was looking at was just sitting there and not moving at all. The further I drove west the longer a shadow it cast until it just looked like a smudge or a cloud. When I drove back to see it the shadow got smaller and then it was a circle again. Has any one seen this thing? No one there seemed to notice it so I didn't bother asking any one.

I made it to Arizona, called my wife, and made up with her. Then I drove all the way back, but I took the northern route and didn't see any thing weird until I got back. When I back home I told everyone what I saw. They thought it was silly. Until a couple days later when my kids ran in the house and said my UFO is here! I went outside and the kids asked me is that what u saw and I told them yes it was. It was about 3 times or so larger in size and the same color (grey), but there was no shadow thing behind it. One of my kid's friends said he heard on the news that it was a weather balloon that got away and it came from New Mexico. Also, that it was at a height of 6000 feet and was 600 feet in diameter. I don't believe it because where in the world can you get a 600 feet diameter balloon. This thing was a perfect sphere. I watched it for a minute and went in the house to call my friend and he was already on the phone. I picked and he told me to look outside and that my UFO was here. I

said I know and we spoke for maybe a minute and I went back out side to look at it. By this time it was gone the kids were gone, too. Maybe I experienced a time loss or something. I didn't think to check the clock. Well that's my story and I'm sticking to it.

## **Greensburg and Delmont, Pennsylvania**

**November 28, 2001**

By Eric Aixelsyd

I saw something bright green fall from the sky off the side of the road while driving home from my girlfriend's house. I stopped the car and looked, but it landed to far away to see exactly where it was, & in an unfamiliar part of the area. I'd ay it was a meteor or a piece of a satellite. It was very bright... almost like a flare... but green. I wanted to go to try to find it, but was very tired. I see falling stars all the time on that drive. I didn't know if it was a mistle or what... Happened so fast I stopped & looked up in the sky... then looked at the ground & didn't see the spot where it hit anymore.

## **Hampton Bays, New York**

**Summer 2000**

By Eugene Fields

It was 2 A.M. and I was going to bed. I looked out bedroom window, as is habit to possibly see one, and I saw a star move about an inch before it jumped again an inch, Zig Zagging from South to North. The whole process took about 15 minutes. It stopped at each point on the zigzag pattern and rested there before blipping out to the next coordinate! All my hair was standing on end! I could not believe what I was seeing! Then I saw another light, same as the first one, about 2 inches to the left (east) zig zagging precisely the same as the first one.. 2 brothers? So Unreal!! I finally SAW with MY OWN EYES!!

10 years ago I heard this in meditation as was prodded to record it:

A Message From Our Family:

"Oh, Great Being of the Earth! Know that as you even doubt your worth your race is the most advanced of the Creation and as such, Ye are even studied by other life forms with a seemingly advanced culture. However do not be deceived! As they have come from the heavens. Know, Great Being of Earth, They Seek to study, You, As they have traveled through dimensions and space unimaginable as yet to you, to gaze on you.

For, as Ye have little Technology compared to them, Know, Ye Great Beings of Earth, that within your structures are more capabilities than ever possible, with any life form, before! Those who seem so far advanced as they are able to appear and disappear at will, can never develop to the capacity 'possible and inherent' in YOU! They Know this and seek to integrate these seemingly benign powers to integrate them for themselves. This is not to be however as they have violated 'Creations Laws' in order to bring this about. They shall meet with limited success.

Once you unlock the secrets of consciousness. This will give you 'Your Powers in the Great', as you Now Have, In the Small. You will Inherit your Destiny with 'The Creation' and will 'in a form' govern the heavens.

Some other life forms marvel and fear at your completeness and your capacities. Your composition is the most complete visualized as of yet by the 'Creation'. You have simply to begin to harness the powers given you, waiting dormant, for thousands of years, in your brains. This is happening at an accelerated rate now. Presently the majority is unaware, asleep.

As your Science, Technology and Spiritual converge, this will become apparent to all. As to unlocking the key to power, simply align your experience with love and respect, for the Creation. As simple as this command is, It has yet to be heeded. This will take place in the generations to come. Never fear you have spanned the abyss and arrived triumphant. We in the

heavens salute you, though now you seem as 'children to yourselves'. 'The Creation' has endowed its' most complete set of functions in your cells. The Universe awaits your simple Recognition of this fact.

Go in Love...XXX"

Transmission through, Eugene Fields

Here are a couple of pictures that I took on the evening in question.

green lights in a circular pattern moving quickly back and forth. Then it stopped, spun in place then it took off.

## **North Asheville, North Carolina**

**May 2001**

By George Whitman

Around 10:30 P.M. on around the 13<sup>th</sup> of May, a group of thirteen of us were sitting around a fire after a long day together. It was spent celebrating a friends graduation from college. Someone saw three lights moving in a triangular formation very quickly across the sky. We all observed the lights for approximately two minutes as they made their way to the horizon. They seemed to "warble" or "bob" and not stay in a straight path. Eventually they disappeared before reaching the horizon line. I thought they were off-yellow, although other witnesses claimed seeing blue or red lights.

## **Southgate, Michigan**

**June 21, 1999**

By Gregory L. Farner

I looked up at the Eastern sky to see a gold object traveling west. There were no clouds in the sky, but I noticed a big halo around the object. It stopped and then moved in a Southerly direction. Then it stopped again before disappearing into space through a tunnel of halos. The whole experience lasted maybe 30 seconds. My wife was with me but never looked up. I live in Taylor and estimated it to be over Southgate. It still bothers me!

## **Edmond, Oklahoma**

**January 8, 2002**

By Horton L. Deakins

As I was driving North on Bryant Avenue Just North of Second Street, I saw a bright object (there were plenty of city lights, so it had to be bright for me to see it) appear to fall to the ground. There was no way to tell the distance, but I would estimate the azimuth to be about 5-10 degrees West of North, and the altitude when I first observed it to be less than 30 degrees. It had a greenish tinge to it, and left no trail as might a meteor. The time span from my first

observance to when it dropped out of sight was probably around three seconds, but no more than five. It definitely had the appearance of something in a free fall, but could have been moving more slowly. I got the distinct impression the object was "rocking" as it fell, almost like an out-of-control helicopter, but with only the one light.

## **Tavares, Florida - Lake County**

**July 12, 2001**

By Ian Francis Hartman

I was driving my car home after hanging out with some friends and I saw a bright light above me and I looked out the window and I was blinded by the intensity of the light as a space craft hovered past me. Shortly after I woke up in my bed, I don't remember driving the rest of the way home or anything.

## **Kharkov, Ukraine (USSR)**

**Date Not Given**

By Ilya Alexandrovich Gribanov

I saw a lot of shiny objects fall onto the ground from the sky and a big "W-like" object flew above my head on the height of about 100 meters afterwards. It looked like an object flew from out of space to the Earth and made a dive followed by a low swoop above the ground without making any noise at all. The object had a lot of lights on it, it was silver.

## **Wilcox, Arizona**

**June 1, 2001**

By Jake - 7<sup>th</sup> Grader from Benson, AZ

I was in Wilcox, Arizona when I was looking up at the stars. I saw a big blue Light, a little smaller than the moon, flash and disappear.

## **Heiskell, TN - Knox County**

**October 14, 1998**

By Jim C. Chandley

I observed a rectangular object with pointed ends with white, unblinking lights on each end traveling parallel to Raccoon Valley Road from East to West for approximately 2 minutes until it moved from my range of vision. Holding my hand out at arm's length it was approximately 1.5 to 2" in length. It was accompanied by two airplanes or jets, one in front of it and one behind it. These two aircraft had the unusual red and green, blinking lights on their wings. I heard no sounds of airplane or jet engines during this sighting.

## **Candler, North Carolina**

**Approximately November of 1993**

By Janet Joan Atkins

I had been watching a strange light in the sky it was around ten thirty at night. I telephoned my brother that lives right above me for him and his family to come outside to take a look at this light. Eight of us were in the driveway looking at the light, when it started to move in the sky and in a blink of an eye it was right over the top us. There was no sound at all from this space craft and it was huge in size. We all seen this and then it was gone as fast as it appeared it also disappeared.

## **Mesa, Arizona In The Phoenix Valley**

**Approximately October 5, 2001**

By Jean De Haerne

### **The First Sighting**

It appeared as a burning red object in the sky, moving downwards losing altitude, but then veers off to the North and out of the horizon. I write that it looked like it was burning because it had a definite trail of red smoke or fire behind it. It almost looked like a meteor, however there has none reported. If it was one, it would of landed in Chandler/Awahtukee or Tempe by it's position in Arizona - all very much crowded areas.

### **The Second Sighting**

It was two objects moving parallel to each other. It seemed to be slowly moving Westward and gaining altitude at the same time. At first when they were both lower I was able to make out some sort of shape, which was almost like a vertical airplane - but moving horizontally. The color of both shapes were black with dark gray.

### **Note:**

Both of these sightings were over the new air lane here (at least where all the airlines seem to be flying through nowadays). I took many photographs on first sighting, was able to take one or two on second sighting.

## **Alexandria, Virginia - Fairfax County Line**

**During The Year of 1969 Sometime**

By Jean-Claude Toran

We working when an unusually bright light just appeared, then two lights, then three lights... They floated for a few seconds and when we all said UFO's they were gone... I saw them with my own eyes and have not ever forgotten it. When we got back to the prison camp we heard others had seen the same thing and it was on the news... Never heard any more about it.

## **Rising Sun, Maryland**

**July 10, 2000**

By Jennifer F.T. and Kelly M.

I decided to walk my dog... which I do not do often. There was new building going on at the top of a very steep hill in my development. I got my friend Kelly to go with me for fun.

We both had a few drinks at her cook out but this did not take away from what we saw. As we got tot the top of our very steep hill. I saw a bright green light hovering above tree level to my left... My dog did not seem to notice but I thought it odd.

We continued our conversation as we neared the crest of the road. I interjected at this point...

# The AMERICAN UFO JOURNAL

~ Page Thirteen ~

I told her I wanted her to do something for me... and not to look until I told her what. She complied. I said very calmly never having looked at the light "I see something to my left that I just want you to look at, don't look now"... She looked puzzled... As we neared the top of the hill the light was very bright... I said, "when I count to three... look to the left and tell me what you see"...1..2..3... she looked... I looked... I saw a green streak of light move fast toward the North... It was gone!

I asked her what she saw... She said "a green streak of light"... I told her how I had seen it there for most of the walk up the hill above the trees... We were both freaked out by this... I live in a one stoplight town out in the country... This made no noise at all and left a ghost on my retina... Like when you look at a bright light and look away... You still see the light... There were no occupants in the houses being built in my area at that time... I kind of felt lucky to have seen it... and to know that I was not fooling myself.

## Rising Sun, Maryland July 10, 2000

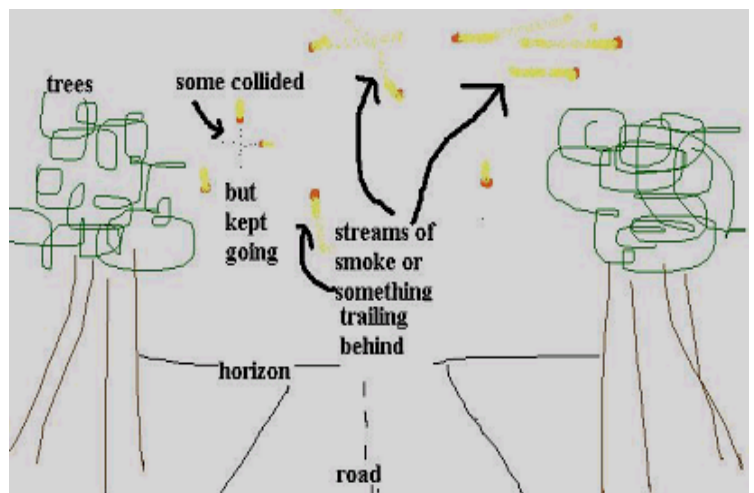

By Jennifer F.T. and Kelly M.

I was driving down to Iva to visit my grandfather and my mother and I saw something very bizarre while we were on the interstate near Anderson. We saw some odd lights. At first it appeared to be like the stream of cloud or smoke that trails behind an airplane through the sky. But then we saw that there were TEN of these strange things going in all different directions! Some were headed straight down for the ground VERY SLOWLY, some were going to the right, some to the left, some were going straight up! All were moving extremely slow! These were not airplanes... trust me!!! A couple of these things looked almost like balls of fire in the sky headed for the ground, but very slowly! I thought "maybe meteors??" But meteors don't go that slow.

The most convincing thing to me that what we saw were just not normal... Was the fact that a couple of times these strange lights collided together, but nothing happened! ALSO, there was a black helicopter in the sky near the strange lights, apparently hovering and watching the lights as well.

There were people stopped on the interstate to watch the phenomenon, construction workers were stopped on an overpass watching it. This phenomenon continued for about 15 to 20 minutes. Whatever it was it was nothing like anything I have ever seen before, and I cannot rationally explain what I saw! I can tell you they were NOT airplanes, meteors, firecrackers, or jets. There is no military base around Anderson that I know of, but correct me if I am wrong. The weirdest part of all is this? One of the "balls of fire" looking things that didn't really have a long smoke tail behind it was coming straight for the ground. I saw the helicopter go near it, and all of a sudden the ball of fire or whatever it was turned around and shot straight up to the sky at a high rate of speed....about 100 times faster than it was going on its way down. It kept going straight up..not slanted like an airplane would, but straight up, until it was out of sight. Eventually the "things" disappeared. It was so weird. Did anyone else see this, or am I losing my mind??? I looked in the Anderson paper for it Thanksgiving day to see if there was an explanation or maybe just an article about it, but there was NOTHING. I think we were near Exit 29, perhaps a little past it South on I-85. If anyone has any explanation, please let me know! I tried to video tape the phenomenon, but my video camera wasn't charged good enough and I only caught about 3 seconds on tape and that's not enough time for you to see what was going on.

This is a crude drawing using a paint program on the computer of what I saw.
